Systems Analysis student with experience in personal and freelance projects using .NET Core, Entity Framework, SQL Server, HTML, CSS, JavaScript, and MySQL. Seeking my first formal opportunity as a developer. English level B2-C1.

PROYECTOS

Personal Finance Management Web App

- Technologies Used: ASP.NET Core, Entity Framework, JavaScript, jQuery, HTML, CSS, and Bootstrap
- MVC architecture following SOLID and KISS principles
- Database-first with SQL Server and SQL Server Management Studio
- Authentication system (login/registration) and data handling with DAO and DTO

Description

The web app is designed to manually track personal finances. It features a login and registration system, allows linking of bank and non-bank accounts to the user profile, and enables the addition of amounts and transactions. Users can create custom names to precisely monitor their finances and view transaction history within the app.

EXPERIENCE

Freelance Web Developer | E-commerce venture | 03/25 - Present

- Designed online store using HTML, CSS, and JavaScript
- Database made in MySQL
- Github for version control
- Transferred files to production via FTP (FileZilla)
